

The Software Index

CRASH was a monthly UK publication dedicated to the Sinclair ZX Spectrum. Published by Newsfield, it ran from May 1983 until April 1992, during which time it reviewed thousands of games and utilities. This software index, made in association with *CRASH: The Online Edition*, lists the overall scores CRASH awarded in those reviews.

Titles beginning with numbers are listed at the start of the directory, and titles beginning with 'The' are listed under their second word (e.g. "Great Escape, The").

The entry for each piece of software gives its name, producer and Overall CRASH percentage, and the issue and page of CRASH in which it is reviewed, as follows:

title producer Overall% issue-page

Review scores for issues 1-59 have been taken from the lists printed in CRASH issues 48 and 61. Scores for issues 60 to 98 have been taken directly from the appropriate issues. Scores scanned from the lists have not been checked against the published reviews.

Early adventures ratings were out of ten rather than 100, while initially strategy games were not given marks, and educational software was never given percentages. Reviews where no numerical rating was given are marked as NR (not rated).

CRASH Smashes were usually (but not always) awarded to games rated 90% or above, starting from issue 4.

For a comprehensive set of transcribed CRASH reviews, see [The ZX Spectrum Reviews Database](#).

All artwork is used with the kind permission of [Art of Oliver Frey](#).

2507 games listed; 2703 reviews; Updated: 23rd July 2018
